

The idea of taking our gun rights away has worked for others in history:

It worked for Australia, and when the China virus hit there, they were able to keep their citizens locked in their homes and controlled! Just as it was in China and is now!

It worked for Hitler when the gun laws of 1938 took over - the ones that he implemented and then facilitated the rise of Nazism and the holocaust and death to millions, including Americans, who died in World War II. To those that said it was a nominal number, I disagree!

Now look to the future...We don't know yet what the damage will be by the southern border left with wide open gates, the last two years, which have allowed millions of unvetted, dangerous illegal immigrants into our country. You think they won't have weapons?

Really, you don't think they will want to rob us when they can't get the jobs they think they're going to get or they're already here to rob us anyway Or when the benefits they're here to steal all run out?

Let's be real - terrorism will be the legacy of those that let this happen. Where are these politicians going to be there when our families are raped, beaten, and murdered again? Are they going to be responsible in the courts of law because they took away our rights of protection? The right to protect ourselves?

We have no idea what's going to be committed in the future but you can bet that it's going to be American families that pay the price and it starts with the passage of laws like HR6816 and HR6667 and others! Well we can't stop everything but don't tell your families you were part of this! These laws must be stopped now! And not just the current ones they are trying to pass through - but also past ones that have already hurt this state, and this country. For the safety of our kids' futures and our rights as Americans, I'd like to see every representative in Hartford recite the second amendment to everyone. And tell them what it means to them!

Who are they working for? It doesn't seem as if they are representing anyone in Connecticut! What is the real motivation here? Why would they want to take away rights that we were born with? Along with the serious anti-business legislation, this hurts the gun manufacturers and gun stores. Shame on them!

I ask, again, who are they working for? It sure isn't the citizens of the United States of America! That's for damn sure! Thank you.

Yours Truly,

Citizen Tom Crotty
